

Scientific discipline: **environmental engineering, mining and energy**

Main affiliation **Wroclaw University of Science and Technology**

Katarzyna Pactwa graduated from two departments at Wroclaw University of Technology: Chemical and Geoengineering, Mining and Geology. In 2012 she defended her Ph. D. thesis: *Statistical description of copper concentration in a deposit in a selected LGOM area*. At 2009 to 2013 she was a member of the project: *Strategies and technological scenarios of development and use of rock mineral deposit*, coordinated by the Poltegor Institute - Institute of Opencast Mining in Wroclaw. She participated in a task: *Pilot geographical information system for selected regions of stone resources exploitation in the region of Lower Silesia*. In January 2013, she was employed in Industrial and GeoEconomics Division (WUST). Since 2019, Katarzyna Pactwa is employed as a professor in Department of Mining and Geodesy. She is interested in sustainable development (SD), corporate social responsibility (CSR), geostatistics and geographic information systems (GIS). She is a co-author of many scientific publications, studies for industry and expertise.
